DETAILED ACTION

1. Claim 1-10 and 12-14 are allowed.

The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of claims 1-5 is the inclusion of the method step of an inkjet printer that includes if the temperature of the printhead is greater than the reference temperature, raising the velocity of the carriage during the upcoming swath for ensuring that a distance ink is ejected from the printhead to the print medium is kept substantially constant during each swath. It is this step found in the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 6-9 is the inclusion of the limitation of an inkjet printer that includes a control circuit for comparing the temperature of the printhead to at least one reference temperature and for raising the velocity of the carriage during the upcoming swath if the temperature of the printhead is greater than the reference temperature for ensuring that a distance ink is ejected from the printhead to the print medium is kept substantially constant during each swath. It is this limitation found in the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable of the prior art.

The primary reason for the allowance of claims 10 and 12-14 is the inclusion of the method step of a printhead that includes consulting a lookup table containing a plurality of temperature ranges and corresponding carriage velocities, determining a current temperature range based on the measured temperature of the printhead, and adjusting the velocity of the carriage to be the carriage velocity corresponding to the current temperature range. It is this step

found in the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

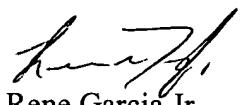

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
